

## PATIENT TESTIMONIAL

Dear patient,

We hope to educate and tell others about the effectiveness of chiropractic care on our patients. Please take a few minutes and let others hear about how chiropractic care has benefited your health &/or your family. Here are a few sample questions to help you.

- Describe your overall health prior to chiropractic care?
- How has chiropractic care changed your life?
- What would you say to a friend or family member who was curious about chiropractic care?
- What has pleased you the most in your course of treatment at our practice?

Before I started seeing Terry at Total Balance Chiropractic, I was in terrible shape! Was rarely pain free, couldn't do a lot of exercises, walking any decent amount of time, Washing my feet in the shower - or sitting for any length of time. I couldn't even be intimate with my partner of 14 yrs. Now considering I was 37 when I started with Terry - that's a pretty sad existence.

I am now 'nearly' 100% pain free, have been going to Original Bootcamp Merewether 3 times a week, & am expecting my 1st child! THANK YOU!
