

PATIENT TESTIMONIAL

Dear patient,

We hope to educate and tell others about the effectiveness of chiropractic care on our patients. Please take a few minutes and let others hear about how chiropractic care has benefited your health &/or your family. Here are a few sample questions to help you.

- Describe your overall health prior to chiropractic care?
- How has chiropractic care changed your life?
- What would you say to a friend or family member who was curious about chiropractic care?
- What has pleased you the most in your course of treatment at our practice?

Before I started seeing Terry Chen for
chiropractic care, I was suffering pain
daily, and couldn't move my right hand past
shoulder height.

With chiropractic care I now have no pain
in my neck & can move my arm fully without
pain. My posture is better and my back is
much stronger. I'm able to go about my daily
tasks & get better results from exercise. I
also sleep better. I'd recommend any friend
or family member to see Terry, as the results
I've had are great.

I was most pleased with the gradual improvement
I've seen, and the care shown by everyone at the
practice.
