

## PATIENT TESTIMONIAL

Dear patient,

We hope to educate and tell others about the effectiveness of chiropractic care on our patients. Please take a few minutes and let others hear about how chiropractic care has benefited your health &/or your family. Here are a few sample questions to help you.

- Describe your overall health prior to chiropractic care?
- How has chiropractic care changed your life?
- What would you say to a friend or family member who was curious about chiropractic care?
- What has pleased you the most in your course of treatment at our practice?

- Before coming to Total Balance I was in chronic back pain. I couldn't even get comfortable in bed. constant headaches.

- Since, I can now sleep comfortably. Huge reduction in amount of headaches and I bounce back quicker after physical activity

- Give it a try, it works. Being a nurse I am not a fan of general concept of chiropractic but Total balance is a different approach and it works. !!

- The friendliness and welcome attitude whenever I go. Nat is always lovely and Terry is great. I am "so not" happy he is leaving.
