

PATIENT TESTIMONIAL

Dear patient,

We hope to educate and tell others about the effectiveness of chiropractic care on our patients. Please take a few minutes and let others hear about how chiropractic care has benefited your health &/or your family. Here are a few sample questions to help you.

- Describe your overall health prior to chiropractic care?
- How has chiropractic care changed your life?
- What would you say to a friend or family member who was curious about chiropractic care?
- What has pleased you the most in your course of treatment at our practice?

Prior to Chiropractic care I was at the stage that neck and lower back pain were a normal part of my day to day life. Now since commencing Chiropractic care I am feeling so much better. Neck and ~~lower~~ back are a lot less stiff, and feeling good in my body has motivated me to exercise more than ever. I would definitely recommend Terry and Chiropractic care because it improves your life and you can reach your full potential.
