

PATIENT TESTIMONIAL

Dear patient,

We hope to educate and tell others about the effectiveness of chiropractic care on our patients. Please take a few minutes and let others hear about how chiropractic care has benefited your health &/or your family. Here are a few sample questions to help you.

- Describe your overall health prior to chiropractic care?
- How has chiropractic care changed your life?
- What would you say to a friend or family member who was curious about chiropractic care?
- What has pleased you the most in your course of treatment at our practice?

Before chiropractic care I had terrible headaches, found it so difficult to get to sleep and did not like my body as I had terrible posture. Chiropractic care has been so wonderful for me. I found out that I have scoliosis and with Terry's help and weekly adjustments, my spine is unwinding significantly. I no longer have headaches and I sleep so much better than what I ever use to. I am so much happier with my body as I have noticed a significant change in my posture. Terry is a great chiropractor and I will continue to visit him for as long as it takes ☺

Name: Kristen Webb
