

PATIENT TESTIMONIAL

Dear patient,

We hope to educate and tell others about the effectiveness of chiropractic care on our patients. Please take a few minutes and let others hear about how chiropractic care has benefited your health &/or your family. Here are a few sample questions to help you.

- Describe your overall health prior to chiropractic care?
- How has chiropractic care changed your life?
- What would you say to a friend or family member who was curious about chiropractic care?
- What has pleased you the most in your course of treatment at our practice?

Gary and myself have always had posture problems, Gary also has had many injuries and myself digestive issues, headaches, neck problems to name a few. We met Terry at our initial consultation and was very interested in the different information ^{to what} we thought Chiropractic was. He was very professional and took great care and was patient when we ~~were~~ ^{had} questions. After a regular treatments with Terry we both felt a lot better. We noticed that when we missed appointments for a while we would look forward to going back and getting back on track.

Name: Natasha and Gary
