

## PATIENT TESTIMONIAL

Dear patient,

We hope to educate and tell others about the effectiveness of chiropractic care on our patients. Please take a few minutes and let others hear about how chiropractic care has benefited your health &/or your family. Here are a few sample questions to help you.

- Describe your overall health prior to chiropractic care?
- How has chiropractic care changed your life?
- What would you say to a friend or family member who was curious about chiropractic care?
- What has pleased you the most in your course of treatment at our practice?

Overall I was in great health. I did however get a constant pain in my left shoulder, probably from lifting weights incorrectly. I found the x-ray performed by Total Balance Chiropractic very interesting & was totally surprised by the amount my vertebrae was out of alignment. A number of visits later my pain had ceased & I felt much better. I would recommend chiropractic care as an avenue to seek a healthier body or to assist in alleviating a pain. Your service was on-time, informative & most importantly effective.
